

Add the mobile version Shortcut to your Home Screen:

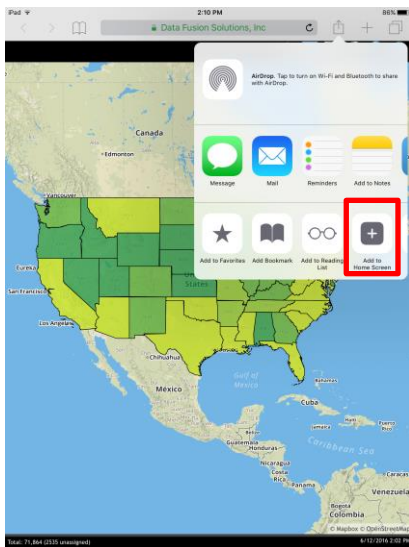

The process for doing this varies by phone and operating system. We have put the instructions for a few phones here. If your phone is not included here or none of these work on your phone, try searching for: "Add web link to your home screen <your phone model>".

iPhone/Safari:

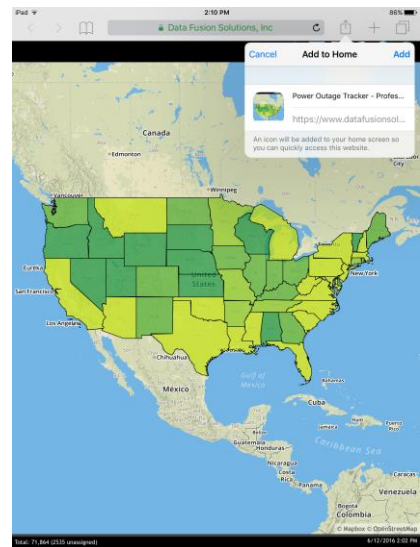

With the Mobile Version open

STEP 1:
Click the share button

STEP 2:
Choose Add to Home Screen

STEP 3:
Give it your own name and click Add
